

Quarter-turn locks free-turning

Item description/product images

Description

Material:

Housing and actuator die-cast zinc.
Nut brass.
Tongue steel.

Version:

Housing trivalent blue passivated.
Lever black KTL coated.
Tongue electro zinc-plated.

Note:

Particularly suitable for steel cabinets, lockers in changing rooms, schools, leisure facilities and industrial companies.

Type of operation:

The integrated free-turning function provides higher security against violent actuation compared to conventional locks.

Assembly:

The quarter-turn lock can be installed pre-assembled.

Attention:

Optimum functionality is guaranteed with padlocks with a shackle diameter of $\varnothing 6$ – $\varnothing 8$ mm.
