

## Five lobe grips plastic, lockable

### Item description/product images

### Description

#### Material:

Grip thermoplastic.  
Bush or threaded pin steel.

#### Version:

Grip black.  
Steel parts blue-passivated.

#### Note:

Lockable five lobe grips prevent unauthorised loosening of the screw connection. The cylinder lock forms a positive lock between grip and screw. When unlocked the grip rotates freely without driving the screw, preventing unauthorised opening of the screw connection.

The lockable five lobe grips are supplied with 2 keys each. The key can be removed in the open and closed position. The locks are a single-key system, i.e. the same key works in all locks.

#### On request:

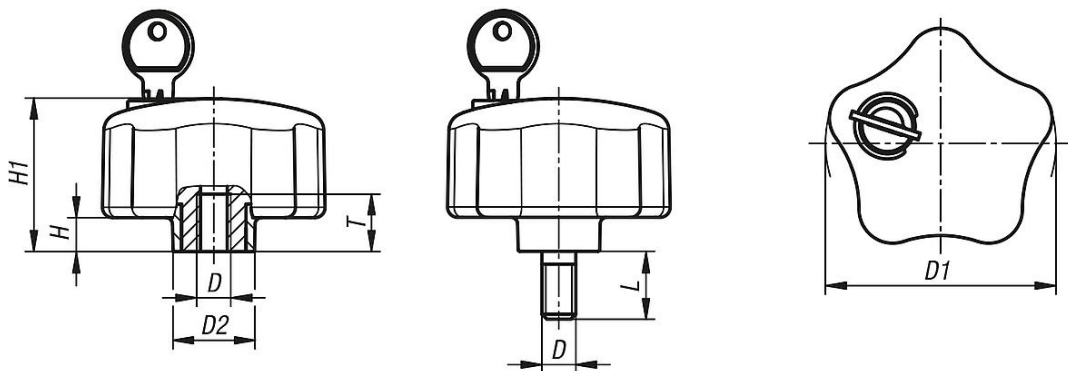

Other versions.
