

Locking pins with key ring

Item description/product images

Description

Material:

Pin steel.

Key ring stainless steel.

Version:

Pins electro zinc-plated.

Key ring bright.

Note:

Locking pins are used for quick and easy fixating and joining of parts and workpieces.

Shearing force double shear (F) = $S \cdot \tau \cdot aB$ max.

The locking pins with key ring represent a cost-effective alternative to other locking pins.
