

Item description/product images

Description

Material:

GJL 250

Version:

Bright, ground.

Note:

The central set screw "N" can be replaced by a clamping lever 06460.

The stated permissible load values (F) are designed for dynamic loads with a lifespan of 1 million travel cycles.

For static loads 10 times the value F is permitted.

The torque values apply only to centred carriages.

TI = number of fastening holes E/M inside

TA = number of fastening holes E/M outside
