

## Grub screw sets with screw-in stop for gluing

### Item description/product images

### Description

#### Version:

Steel trivalent blue passivated.

Stainless steel, bright.

#### Note:

Studs with screw-in stop have been designed especially for gluing-in. They allow mechanical connecting elements with external thread to be made cost-effectively for small and medium-sized series.

The LOCTITE products 638 and 648 have proven themselves in practice as a successful bonding agent.

Technical data see K0404.
